Lim Shu Yi

Partner | Nicholas Actuarial Solutions

shuyi.lim@n-actuarial.com | +6 012 921 2187 | www.n-actuarial.com

Evolution of Actuarial Work with Technology

Objective

The starting point of an actuarial reporting exercise shall be the download of a draft actuarial report from the IT system, not a download of raw policy and claims data.

The actuarial team shall work to analyse this draft report, apply critical judgment and deliver useful recommendations to the business. The actuarial team shall not be involved in producing the draft report.

IBNR Robot Workflow

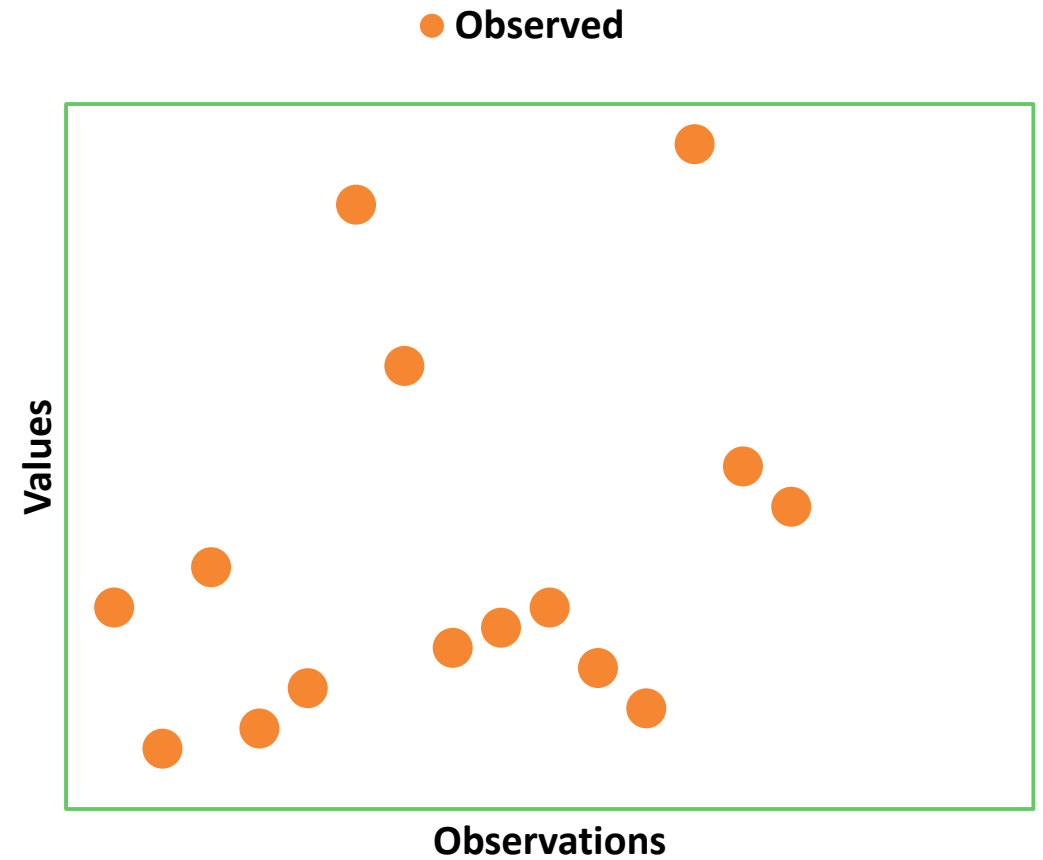

Main Applications of Artificial Intelligence in Actuarial Work

**Deal with
unusual data
values**

**Select
parameters for
actuarial models**

**Select most
appropriate
actuarial method**

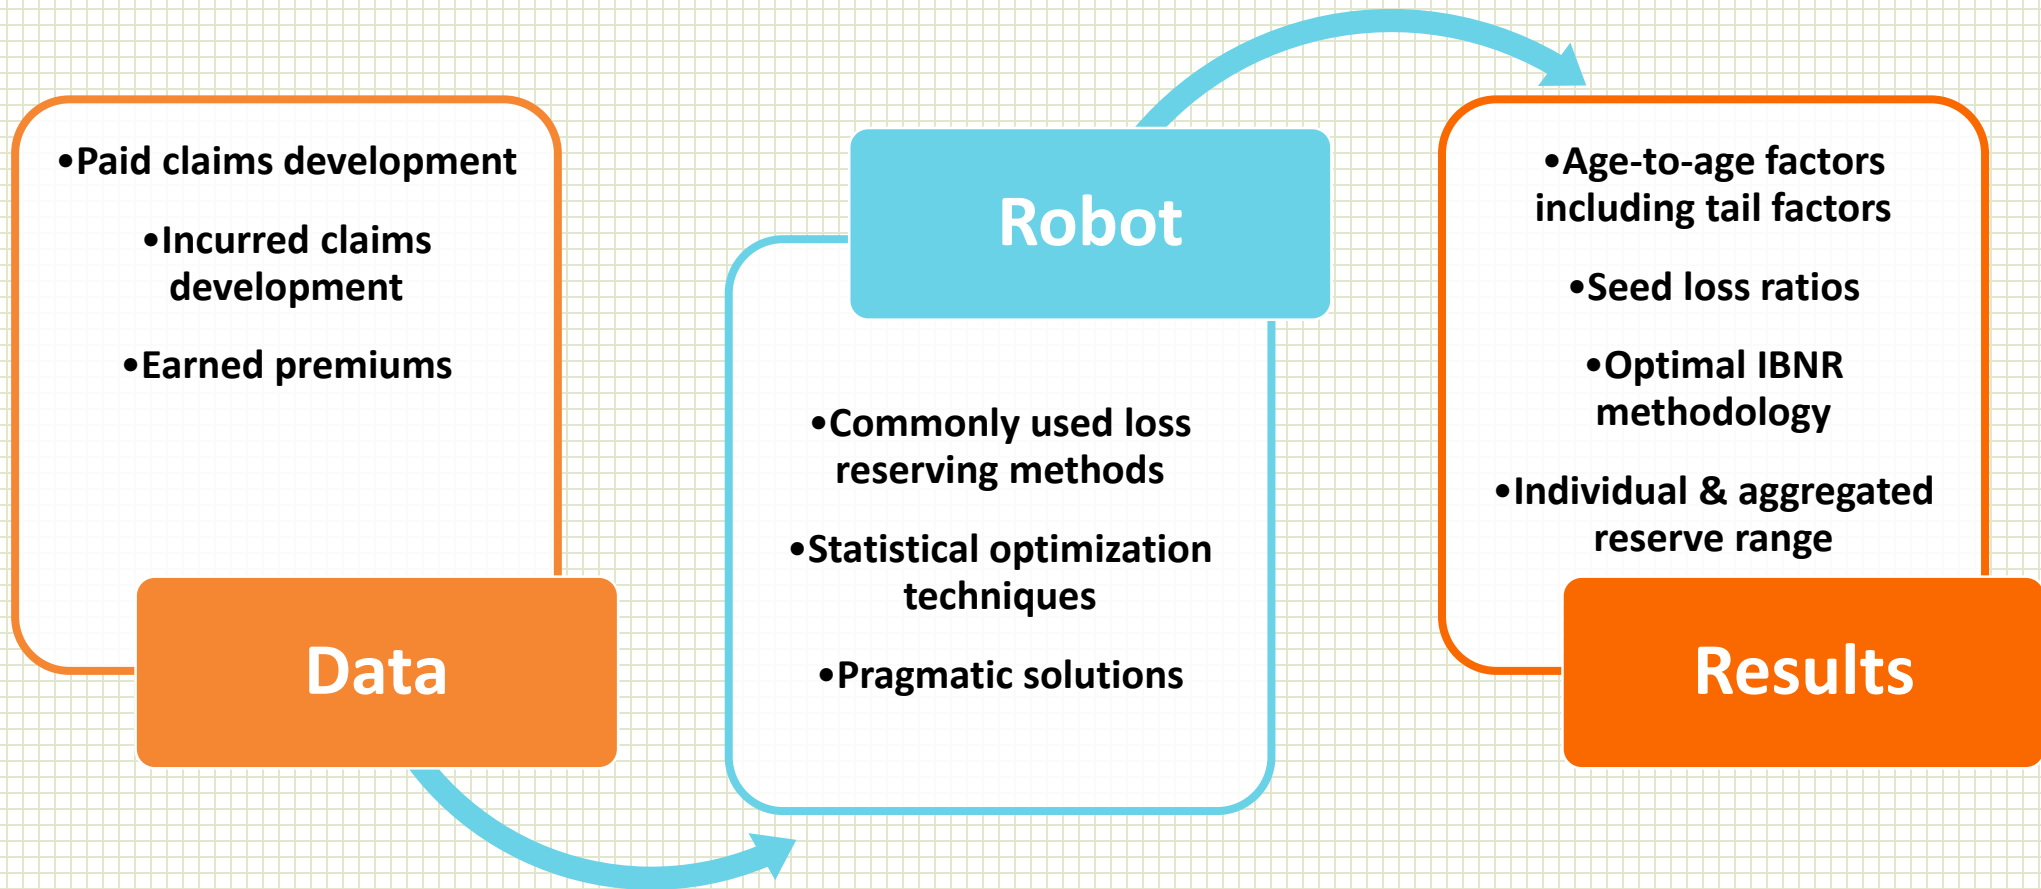

Artificial Intelligence Unusual Value Treatment

Artificial Intelligence Pattern Identification

IBNR Robot

IBNR Robot

Large losses

Data issues

Underwriting practices

Benefit changes

Rate changes

Claims processing speed

Claims reserving practices

Reinsurance programme

Business mix changes

Inflation

External factors

Underwriting cycles

Economic cycles

Calendar effects

A. Link Ratio Method

1: Data Acceptance Replacement Test on Cumulative Claims Ratio

Objective: Reduce Distortions from Input Data Errors

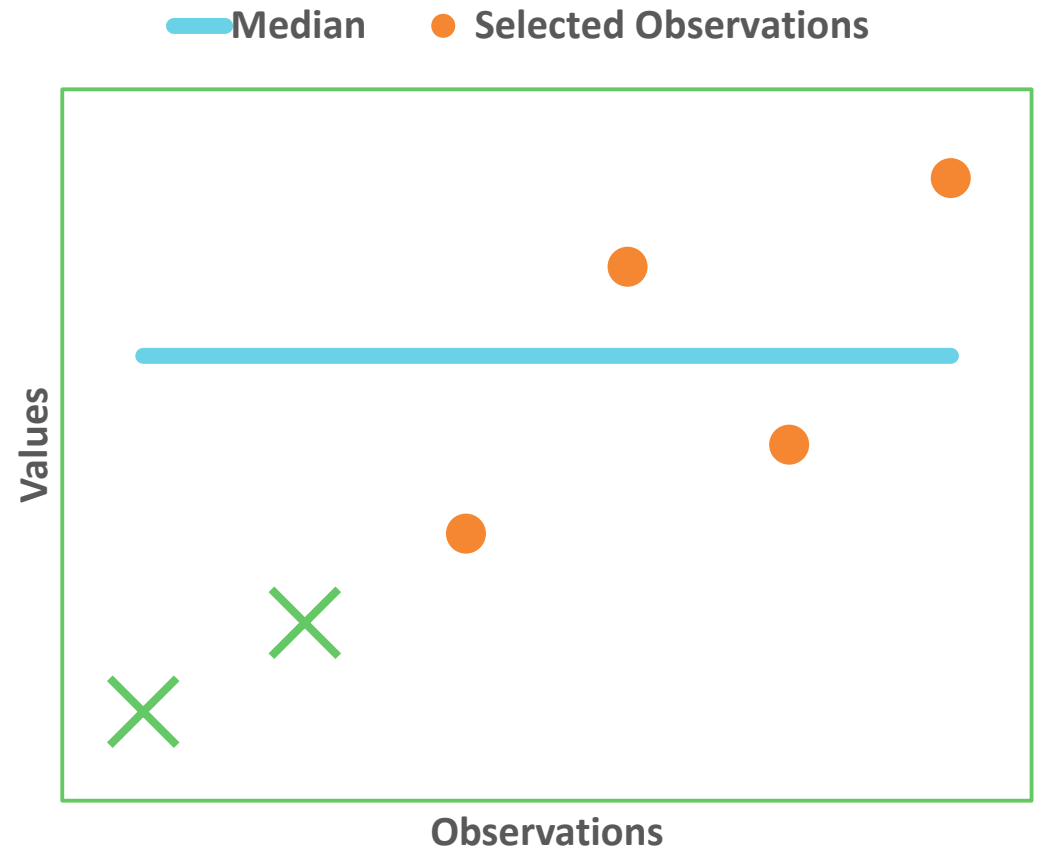

Birds of a Feather Flocks Together

2: Development Factors Runs Test

Objective: Optimise Relevance and Credibility Effects in Development Factors

3: Decay Factors Runs Test

Objective: Optimise Relevance and Credibility Effects in Tail Factor

n - a c t u a r i a l

Include or Exclude?

4. Significance Test on Correlation Between Methods

Objective: Optimise Standard Deviation Estimate

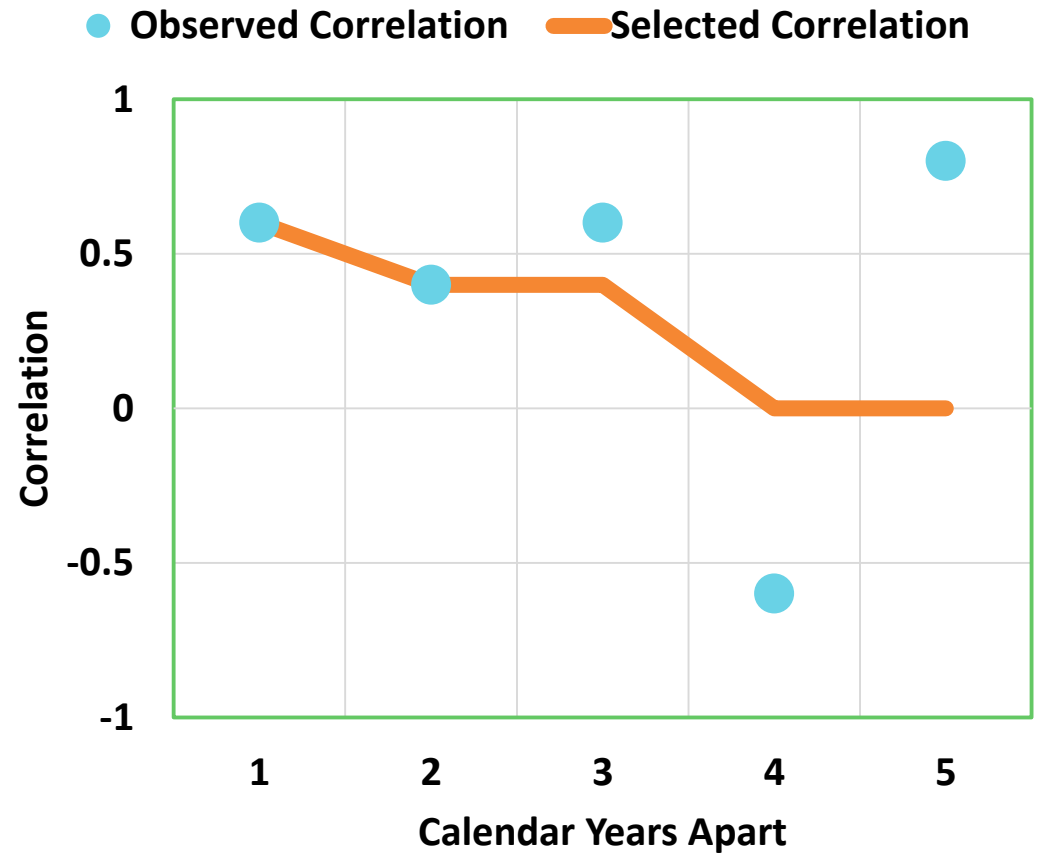

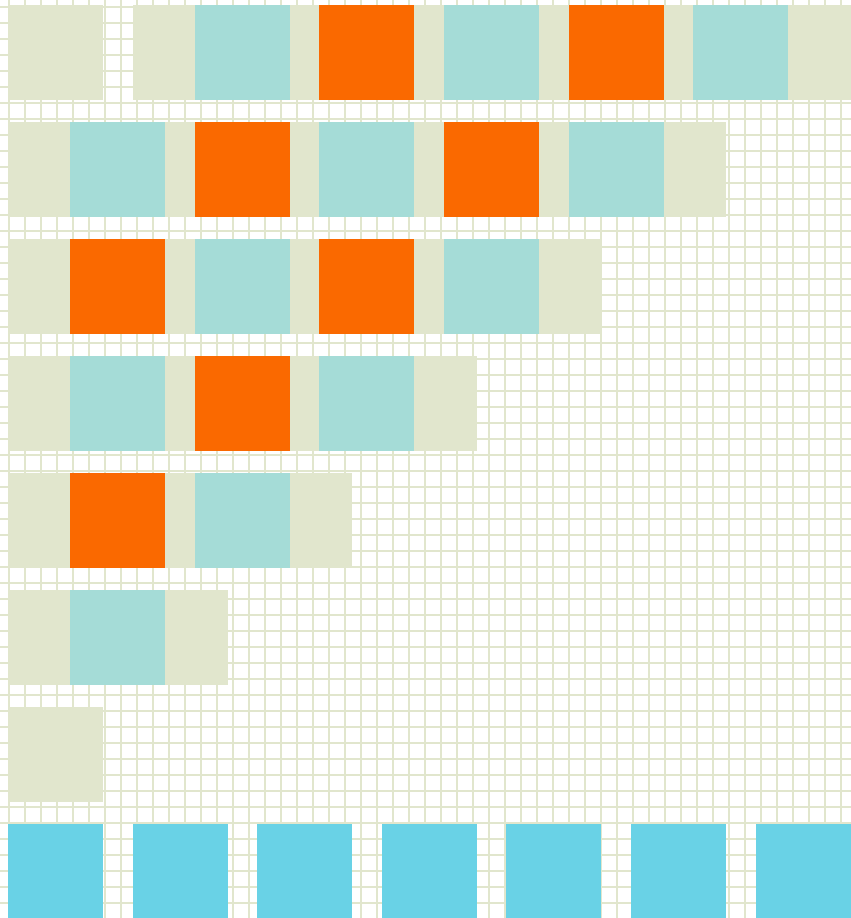

Similar but Different

5. Significance Test on Correlation Between Calendar Years

Objective: Optimise Standard Deviation Estimate

Alike or Unlike?

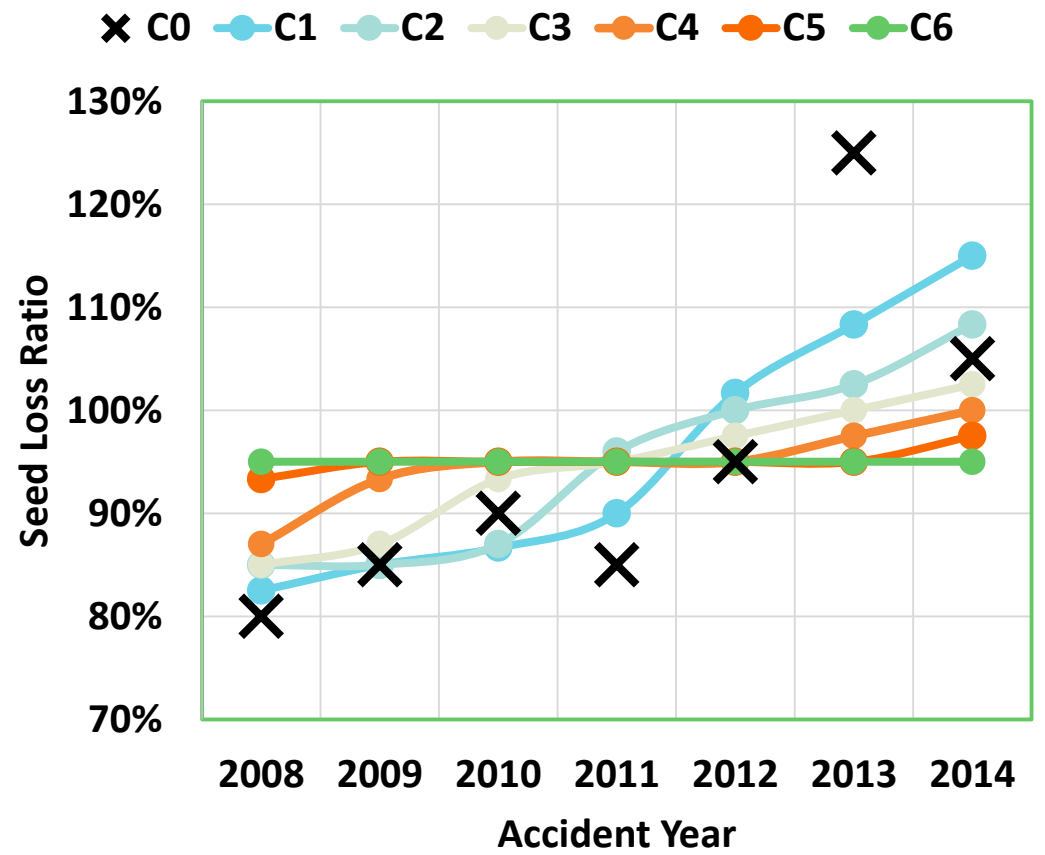

n - a c t u a r i a l

B. BF Method

6: Seed Loss Ratios Generation

Objective: Optimise Homogeneity Effects Between Accident Years

Trial and Error

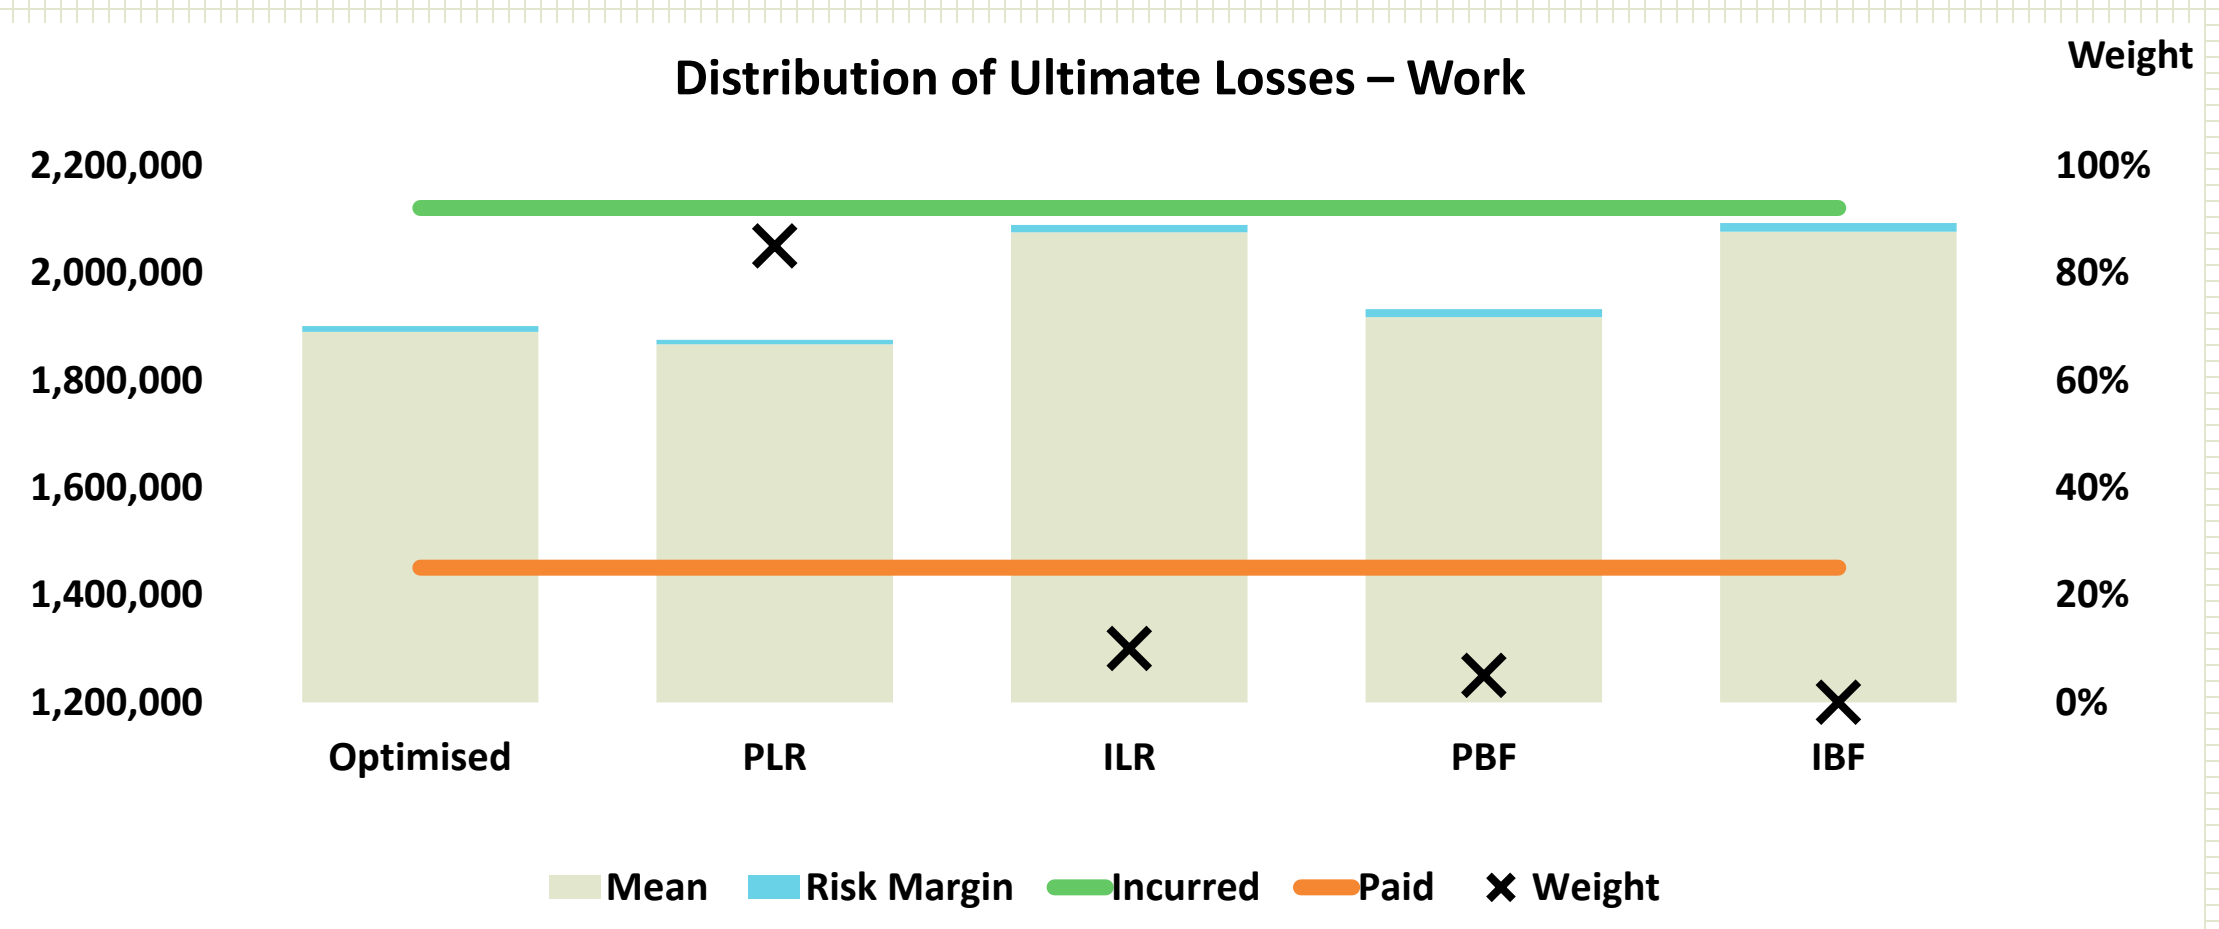

C. Putting it together

7a. Repeat Steps 4 & 5 for BF Method
 7b. Apply Method of Lagrange Multiplier
 Objective: Optimise Individual Class Ultimate Loss Estimate

7a. Repeat Steps 4 & 5 for BF Method
 7b. Apply Method of Lagrange Multiplier
 Objective: Optimise Individual Class Ultimate Loss Estimate

7a. Repeat Steps 4 & 5 for BF Method
 7b. Apply Method of Lagrange Multiplier
 Objective: Optimise Individual Class Ultimate Loss Estimate

Consistency is the Key

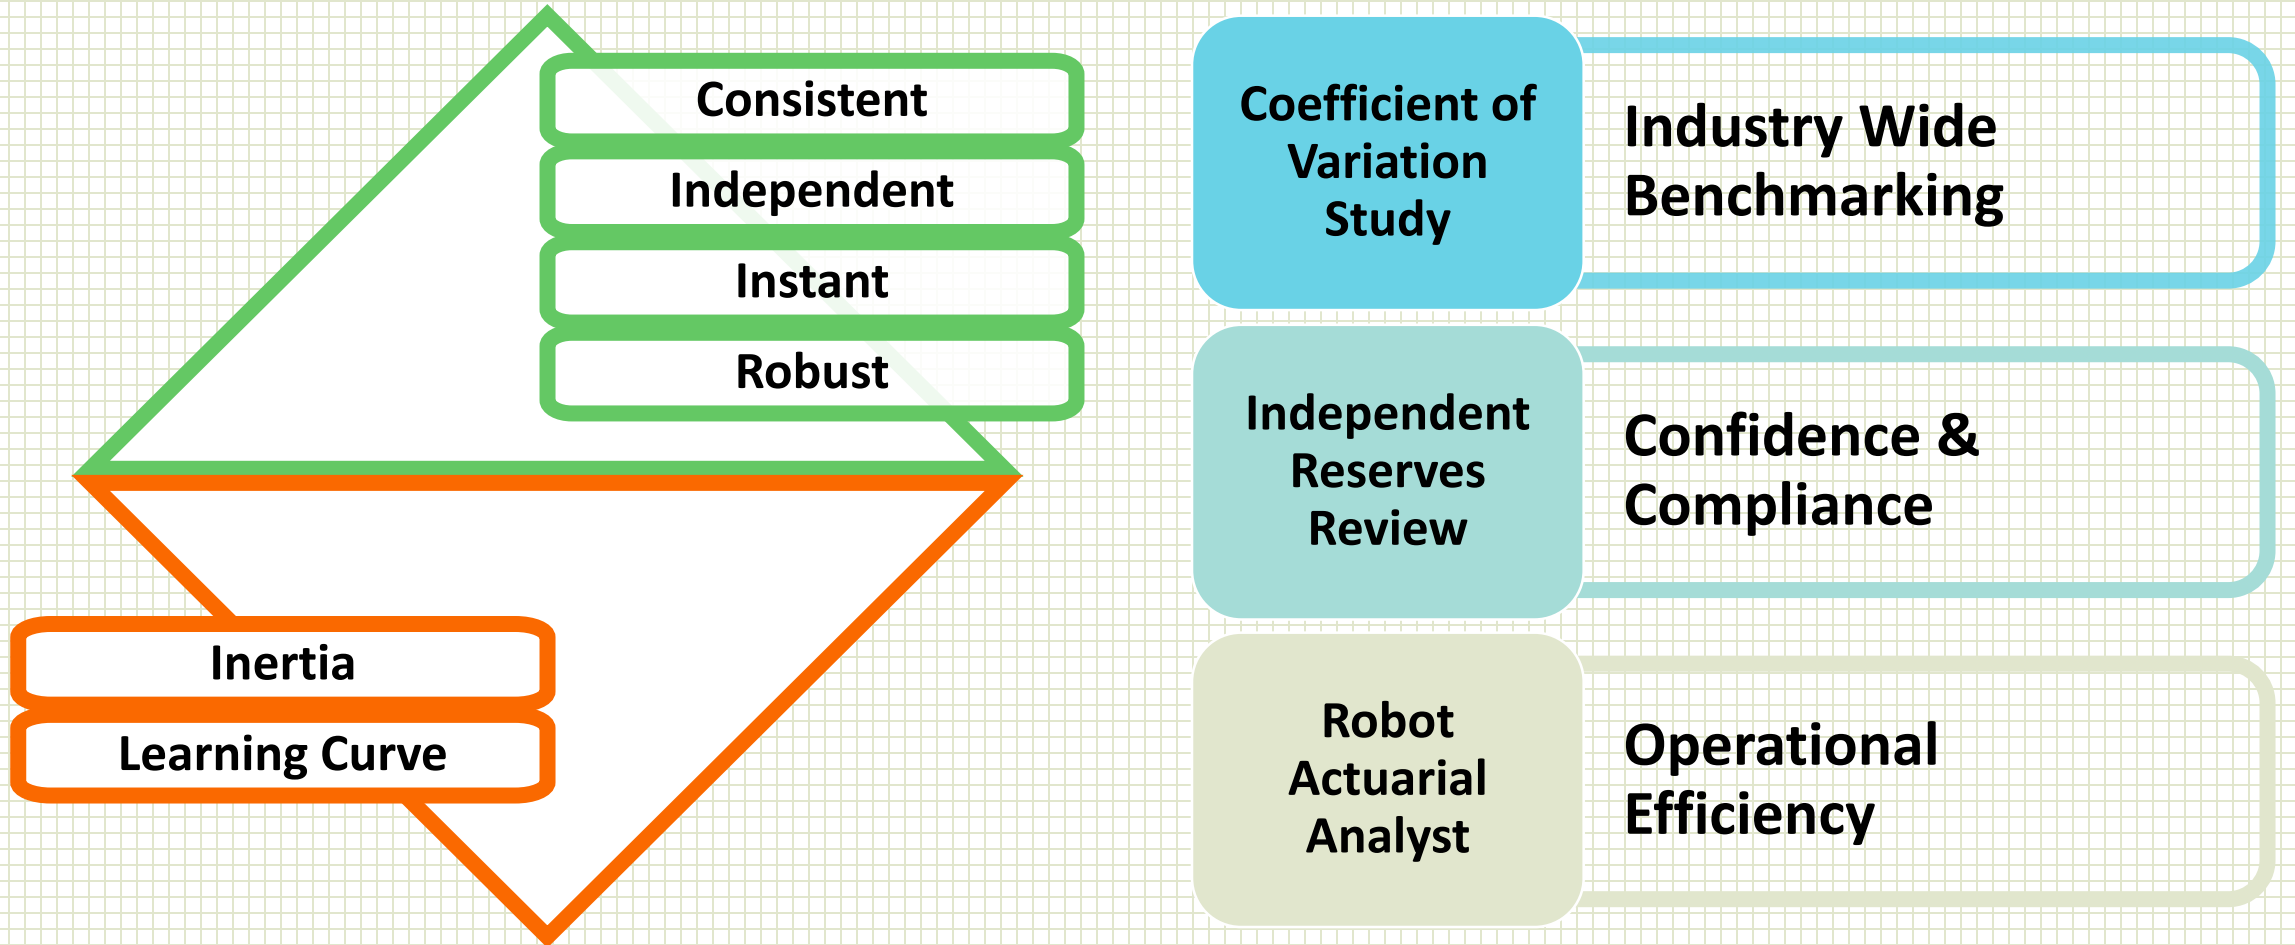

8. Repeat Step 4 Across Business Classes

Objective: Optimise Aggregate Ultimate Loss Estimate

Optimised Loss Reserves Distribution

Strengths & Challenges

Annexure

Stepwise Explanation

Step	Data – Paid & Incurred Claims, Earned Premiums	Paid & Incurred Link Ratio	Paid & Incurred BF	Individual Class Reserves	Aggregate Reserves
1	Data Acceptance Replacement Test				
2	Input	Development Factors Runs Test			
3		Decay Factors Runs Test			
4		Inter-Method Correlation Significance Test			
5		Calendar Year Correlation Significance Test			
6		Input	Seed Loss Ratios Generation		
7	Repeat Steps 4 & 5 with BF Method		Apply Method of Lagrange Multiplier		
8	Input			Repeat Step 4 Across Classes
