DREAM is an innovative, quick & cost effective holistic application of risk management for small local companies to manage their business to grow efficiently & effectively. DREAM can provide you with, at a high level, **Diagnostics**, **Risk** identification, **Evaluation**, **Advice** to address current issues & a plan to **Monitor** the development. It does not include detailed work nor detailed solutions to address current issues.

RISK identification
Determine & communicate risks that could prevent achieving business objectives.

ADVICE
Propose high level solutions to address current key business issues.

D **R** **E** **A** **M**

DIAGNOSTICS
Use tools to holistically assess current business, strategic, financial & operational issues.

EVALUATION
Qualitative & quantitative assessment of risks identified.

MONITOR
Monitor identified risks, identify new risks & monitor execution of solutions.
